

Safety | Sec d

A factory manager decided to improve safety on its factory floor by applying a **RapidShield UV-curable floor coating technology** from **Quaker Chemical Co.** as the chosen solution. Once applied, RapidShield is cured instantly by a portable UV-light unit. In less than 15 minutes, the floor can be used again. The floor coating is non-flammable, low odour, contains all the latest VOC and HAP regulations. It has been tested and approved for distribution warehouses throughout Europe and the USA, and designed for use on a new or existing concrete floor.

Protecting Underground Gas Storage Pipework

Over 20km of pipeline are being used at S. bach / Cnenre c ec a ra gas stage car lles na hare bee f raed b the extraction of brine. To give long-term corrosion f ec l he c ff wre sa ee ll e ne nve l e sec l snare bee rred in Winn & Coales' Densoclad 70 & 70S. Densoclad 70, medium to heavy-duty tape, is designed for

corrosion protection of medium and large diameter pipes, welded joints, bends and fittings, and is applied over the surface. The aggressive backfill, ground or backfill, ensures complete protection and exceptional resistance to damage by impact, poor backfill or aggressive ground conditions. 70S has a stiffer pvc backing, which enables it to withstand greater external pressure.

Seashield Protection

Winn & Coales (Denso) Ltd's SeaShield 2000FD system was specified to give additional protection to a number of legs on Western Ferries new berthing structures at McInroy's Point, Gourock and at Hunter's Quay, Dunoon. The construction and assembly of the tubular pile legs resulted in exposed areas within the tidal zone that did not receive adequate protective coating. The installation of the protective system began with the application of Denso Paste S105, Denso Marine Piling Tape and then the HDPE jackets, which were put into position with stainless steel fixings. Denso Marine Piling Tape, a cold applied petrolatum-based defraser/catalyser, is the primary anti-corrosion protection for the SeaShield system. The jackets will also give abrasion resistance for the Tape system.
